

# SKINWAVE

## Hydrofacial

### AFTERCARE INSTRUCTIONS

01

#### TEMPORARY IRRITATION

- Although rare, skin may experience temporary irritation, tightness, or redness, which usually dissipates within 72 hours depending on skin sensitivity.

02

#### THINGS TO AVOID

- Avoid use of aggressive exfoliation, waxing, and products containing acids that are not part of the recommended take-home regimen in the treated areas for a minimum 2 weeks pre and post-treatment.
- Avoid use of Retin-A type products for 72 hours after.

03

#### SPF & SUN EXPOSURE

- As always, we encourage use sunscreen with a minimum SPF 30 and follow the direction for use.
